

504-005 Current New Parts Warranties

Current Warranties are the warranties that are in effect on Cummins parts as of the date of this publication.

Terms that you should be familiar with when using this section are:

Coverage Effective Date: The date the coverage was put into effect at Cummins. Parts with a warranty start date on or after this date (but before the coverage end date) will have this warranty.

Coverage End Date: The date the coverage was changed by Cummins. Only parts that have a warranty start date between the coverage effective date and the coverage end date are covered by that particular warranty.

Legal Description: Bulletin numbers are provided for each of the warranties that have a published legal description.
